QUALITY CONTROL (WEAVING)

Textile engineering Dept.

4<sup>th</sup> year

Answer the following questions

- 1 – Classify all types of control charts showing a guide for selection of method of analysis
- 2 – what are the main advantages of using quality control charts ?
- 3 – describe with drawing the different cases that you can conclude the process out of control
- 4 – construct the suitable control chart for the following data, does the process exhibit a state of statistical control ?

Production in units per day	% of second quality	Production in units per day	
600	5	600	4
610	5.2	610	4.2
590	5	590	5
595	5.2	595	5.2
605	5	605	8
610	5.2	610	4.8
600	5	600	5
610	5.2	610	5
590	5.2	590	5.2
595	5	595	5
605	5.2	605	5.2
610	8	610	8

- 5 – calculate the  $\bar{X}$  and  $\bar{R}$  control limits for the data in the following table. And construct the control charts . Does the process exhibits a state of statistical control.
