

**6- Pulsus tardus is found in ?**

- A- Mitral stenosis
- B- Aortic valve stenosis
- C- Aortic regurgitation
- D- Mitral regurgitation

**7- JVP waveforms reflect pressure changes in which of the following cardiac chambers ?**

- A. Right atrium
- B. Right ventricle
- C. Left atrium
- D. Left ventricle

**8- The wave produced due to atrial relaxation is ?**

- A. a
- B. v
- C. x
- D. y

**9- Reversed splitting of S1, may be present in patients with ?**

- A. Severe mitral stenosis
- B. Left atrial myxoma
- C. Left bundle branch block
- D. All of the above

**10- Murmur of HOCM becomes louder with ?**

- A- Standing
- B. Squatting
- C. Passive leg raising
- D. All of the above

**11- Acute, severe MR from papillary muscle rupture accompanies**

- A. Inferior MI
- B. Posterior MI
- C. Lateral MI
- D. Any of the above

**12- In mitral stenosis, which of the following is more reliable as an index of severity of valve obstruction ?**

- A. Loudness of S1
- B. Character of murmur
- C. Duration of murmur
- D. Intensity of murmur
